forgotten GENIUS

FORGOTTEN GENIUS

Narrated by Courtney B. Vance

Starring Tony Award-winner Ruben Santiago-Hudson as Percy Julian

Tuesday, February 6 at 8pm ET/PT on NOVA

> pbs.org/nova/julian > [Watch a program preview](#)

NOVA presents the remarkable life story of Percy Julian—one of the great African American scientists of the 20th century. The grandson of Alabama slaves, Julian won worldwide acclaim for his work in organic chemistry and broke the color barrier in American science more than a decade before Jackie Robinson did so in baseball. A brilliant chemist, Julian discovered a way to turn soybeans into synthetic steroids on an industrial scale. His innovative approach to chemistry helped to make drugs like cortisone widely available.

In "Forgotten Genius," a special two-hour presentation, NOVA brings to life Julian's scientific breakthroughs and gripping biography, with vivid period reenactments based on newly accessible family archives and interviews with dozens of colleagues and relatives.
